

MOHAMED FAISAL SINDHI

Lifelong learner | Founder | Builder at heart

Tampa, Florida | +1 (859) 440-7238 | faisalmd543@gmail.com | [linkedin.com/in/mdfaisalsindhi](https://www.linkedin.com/in/mdfaisalsindhi) | github.com/MdFaisalS2025

PROFESSIONAL EXPERIENCE

RAEY

Founder & AI Engineer

Tampa, Florida · Aug 2026 - Present

- Founded **RAEY** to make hospital SOPs searchable through source-cited AI answers. Led product discovery and built the full stack across retrieval, verification, **Next.js**, and **Docker**.
- Made trust the product requirement: every answer cites its source, while a **218-case evaluation** catches **85%** of answers with unsafe errors and passes **82%** of valid answers.

University of South Florida

Graduate Assistant - Healthcare AI

Tampa, Florida · May 2026 - Present

- Designed **SENTINEL**, a **6-agent system** that flags patient deterioration, explains the cause, and suggests next steps. Detected deterioration **2.7 hours earlier** than NEWS2 on synthetic patient data.
- Benchmarked four reasoning approaches on accuracy, lead time, and cost; the rule-based baseline performed best. Also taught **500+ students**, including **Power BI** and **Tableau**.

Microsoft

Microsoft Learn Student Ambassador - USF

Tampa, Florida · Dec 2025 - May 2026

- Led discovery with USF Graduate Advising, documented the requirements, and delivered a **Microsoft 365** workflow the team could operate independently.
- Consolidated manual records into one system covering **100% of recruiting events**, reducing duplicate entry and saving **3 to 4 staff hours per month**.

University of South Florida

Research Assistant - Applied Machine Learning

Tampa, Florida · Jan 2025 - Jan 2026

- Classified Mg-doped ZnO samples from photoluminescence spectra using **PCA and Random Forest** in Python. Two components captured **over 95% of the variance**.
- Established the lab's first automated baseline at **0.72 mean accuracy** under cross-validation, replacing manual interpretation of spectra.

Vee4 Software

Blockchain Engineer (C++ / Python)

United Arab Emirates · Sep 2022 - Nov 2024

- Launched a **Blockchain Name Service** that mapped readable names to wallet addresses, simplifying transfers and contributing to a **40% increase in active users**.
- Implemented **Fully Homomorphic Encryption** and **federated learning** so models could learn from client data without centralizing the raw records.

TechResx Technologies

SEO Analyst & WordPress Developer

Chennai, India · Mar 2021 - Mar 2022

- Increased site traffic **20%** and average session duration **25%** within three months through **SEO and Google Ads** analysis.
- Developed and customized **WordPress** sites in **PHP** with third-party API integrations.

SELECTED PROJECTS

AI Control Hub: Federated Predictive Maintenance | Python, Federated Learning, Cost Modeling

Dec 2025 - May 2026

- Built a cost model that translated failure-detection rates into approximately **\$400K in projected annual savings**.
- Trained federated failure-prediction models across simulated client datasets without pooling raw data, detecting **80% of failures** in evaluation.

Agentic Legal Information Retrieval for Swiss Law | Python, BM25, Neural Reranking

Dec 2025 - May 2026

- Queried **175K legal articles** and **2.4 GB of court records** using BM25, neural reranking, and LLM citation checks, producing **zero fabricated citations** in evaluation.
- Improved **macro-F1 by 19%** over the baseline using adaptive top-K retrieval and cross-lingual term mapping.

Conversational AI Data Explorer | SQL, ERD, Chart.js, Azure

Aug 2025 - Dec 2025

- Developed a full-stack MVC app that answered plain-English questions about U.S. state data through **Chart.js** dashboards, live World Bank data, and an ERD-modeled SQL database.
- Defined the dashboard questions and data model before implementation, then deployed the application on **Azure**.

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript, C++

AI & Retrieval: LangChain, RAG, sentence-transformers, BM25, neural reranking, OpenAI API, Ollama

Machine Learning & Evaluation: scikit-learn, PyTorch, PCA, Random Forest, RAGAS, pytest, cross-validation

Data & BI: pandas, Power BI, Tableau, Chart.js, relational data modeling

Backend & Cloud: FastAPI, Pydantic, SQLAlchemy, Next.js, Docker, GitHub Actions, Azure, Snowflake

Product & Developer Tools: discovery interviews, requirements, acceptance criteria, user training, Claude Code, Git/GitHub

EDUCATION & CERTIFICATIONS

University of South Florida · Master of Science, Artificial Intelligence and Business Analytics

Jan 2025 - Dec 2026

College of Engineering, Anna University · Bachelor of Engineering, Computer Science and Engineering

Aug 2015 - Dec 2019

Besant Technologies, Chennai · Python and C++ programming coursework

2020 - 2021

Certifications: Oracle Cloud Infrastructure Generative AI Professional (2025) · Snowflake SnowPro Platform (2026)
